

Video-Miles®

Designed And Developed by
The Visual Environment Ltd

When using Videoconferencing and or Telepresence, the **Video-Miles®** software **automatically and accurately** calculates, measures and monitors
Amount of Carbon Saved, Amount of Money Saved, Number of People Hours Saved, Number of Video-Miles® used, Number of Calls Made in and out, Utilisation Facts for each and every end-point, Utilisation Facts for entire VC network, Performance of entire network & Number of Attendees who would have travelled per meeting.
All at the click of a mouse

Video-Miles® software analyses all the received data from any Manufacturers endpoints or Management Software, Gatekeepers and MCU's.

Instantly converts the **RAW DATA** into **INFORMATION**.

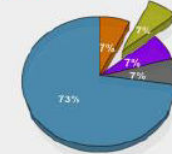

Presents information on Environmental, Financial, Utilisation performance and people hours saved in easy to read and view block graphs, text and pie chart form.

Utilisation statistics for each and every end-point
Information to use Video-Miles® to plan and justify an effective VC Strategy.
Target, drive, measure and monitor people/regions/locations on Utilisation determining your own savings.
Identify instantly where resource, upgrades and new systems are Required.
Budget accurately for upgrades and or new systems.
